Core 18 Phase 4

July 2023

# Agenda

- VSAM64 upgrade
- EU Sanctions Checking
- Period Renewal list enhancement
- Quoting Younger Drivers
- Encrypted User Logins
- Customer Support
- FCA Consumer Duty reports

open gi

**VSAM64**

**Activation**

# VSAM64

With our database re-architecture, the things your Core software does every day just got quicker. Your backups and apps will run much faster. Your data will also be condensed, allowing you to better use your space.

To enable VSAM64 (64bit) in your overnight processing you'll need to opt in and set the pack date.

**Period Renewal List enhancement**

# Period Renewal List Enhancement

The underlying reporting method has been amended for the Period Renewal list, so that items dated older than 30 days are not displayed as this year's premium, ensuring greater accuracy with the information displayed.

Encrypted User Logins

# Encrypted User Logins

The screenshot shows a web browser window with the URL `10.30.2.117/Open-i/EditServer?Editserver27.x=23&Editserver27.y=11`. The browser's address bar shows "Not secure". The page features the "open gi" logo at the top left. Below the logo, there are two main sections: "Menu Options" and "Server".

**Menu Options**

- Save
- Remove
- Cancel

**Server**

Name	VTREMII-200 5017 (GUIENC)
IP Address	10.30.2.200
Port	5017
Local Port	2048
Local Port Repeat	255
Enable Secure Communications	<input checked="" type="checkbox"/>
